Philadelphia.

Will you
Please inform us whether the
enclosed gold piece is good
and worth two dollars &
fifty cents. The size appears
to be right - the weight correct
but the piece defective.
Occasionally we have coins of
the different denominations offered
to us which appear to be
genuine in every respect
except the sound.

We have refused them
believing they were dilled
and filled with other
metal. Our customers take
them to the other banks and
come back and say we
have received change for what
you have thrown out.

We would be very much obliged
for your opinion on this one.

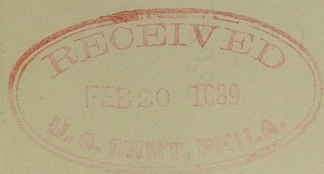

Very Respectfully

[Abstract:] Asks if enclosed gold piece is genuine.

Williamsport National Bank,
Williamsport, Pa.,
February 19, 1889

United States Mint
Philadelphia.

Will you please inform us whether the enclosed gold piece is good and worth two dollars & fifty cents. The size appears to be right – the weight correct but the ring defective. Occasionally we have coins of the different denominations offered to us wherein appear to be genuine in every respect except the sound.

We have refused them believing they were dulled and filled with other metal. Our customers take them to the other banks and come back and say we have received change for what you have thrown out. We would be very much obliged for your opinion on this one.

Very Respectfully
Jas. S. Lawson
